PLATO Complementary Science: call for participation

Following the PLATO Science Conference held in Italy in December 2014, many scientists already responded to the call to participate in the PLATO Complementary Science program. Those who were not at the Conference are now invited to express their interest via

<https://fys.kuleuven.be/ster/Projects/plato-cs/>

The PLATO Complementary Science does not drive the mission design and is not included in the mission costs, so participants must fund their own contributions.

The PLATO Complementary Science program is open to any interested scientist who would like to participate and contribute. It covers all aspects of astrophysics not covered by the core science of the mission.

The core science covers exoplanet science as well as stellar science for stars of spectral type between F5 and K5.

Upcoming events:

02-04 March, 2015: Workshop on "Atmosphere Science in the Context of CHEOPS, TESS, K2 and PLATO"

May/June, 2016: Mission Adoption & SPC approval
